SUBJECT: Town Manager Report

LED Streetlight Project

The first shipments of cobrahead fixtures were received at the DPW. It is projected that Arden Engineering may begin installation of the lights as early as March 17. We also received word that the manufacturing facility in Wuhan, China has reopened. The decorative light fixtures are in process and will we have a better idea on an installation timeline once we have confirmation of the order fulfillment and shipping. Due to the delays in manufacturing, MAPC has extended the project completion deadline to June 30, 2020.

Water Quality

Recent required routine sampling has indicated that water contaminants are within allowable limits and no further outreach or notices were required. Testing is done quarterly at DEP approved points. Mott MacDonald is still working on the hydraulic model and tracer study and once completed they will be available to attend a Select Board meeting to discuss.
