DEPARTMENT OF PUBLIC WORKS

August 14, 2020

Dear Resident:

The Longmeadow Public Works Department is preparing to begin replacement of a badly deteriorating metal culvert pipe that carries Mill Brook under Morningside Drive. Aqua Line Utility Incorporated of Weymouth, Massachusetts has been contracted to complete this project. Work will begin the week of August 17<sup>th</sup>, this will include slope stabilization and other pre-excitation work. Excavation will not begin until early September.

During excavation the road will remain open for one lane travel. Residents who need access to homes between construction hours of 7:00 a.m. and 4:00 p.m. should expect some delays.

The proposed work consists of excavating and removing the existing 36 inch-diameter culvert pipe and replacing it with a new 60 inch high density plastic pipe. Work includes slope stabilization, brush removal, and restoration of road, water, gas and sewer lines. Areas disturbed due to construction will be returned to the original condition as best as possible.

In an effort to facilitate weekly refuse collection, residents are asked to have their refuse and recycling curbside by 7:00 am, especially during the time period that construction work is taking place on your street.

During construction, you will notice various colored painted lines on your property. State laws require anyone who digs to notify utility companies before starting any underground project. The painted lines you will see are the utility companies' way of marking their underground lines.

We will make every effort to notify residents of any scheduled water outages. If an emergency water outage occurs, the contractor will repair the problem as quickly as possible. Water and sewer will be in service at all times. We do realize that this work may cause some inconvenience to the residents, but hope you will bear with us as we improve our town's drainage system.

To report any problems or concerns, please contact Longmeadow Engineering Department at 567-3400.

Respectfully,

Longmeadow Engineering Department

Current Resident  
Longmeadow, MA 01106
